Peter Hermann

**Current Issues & Defect Reporting:**

Metlife issue 1 – from Vic Pizzo on DM6 to DM7 migration.

Left DM6 and brought up new DM7 infrastructure.

April 08 – Many issues found on new DM7 system that were actually defects not migration issues. Content replicator was hanging, would work on a second try, User rights would change thru the day.

The database had the correct information however the GUI did not show the data properly.

BMC has released a fix that will be going GA soon which works much better.

Vic has a list of the issues and tickets related to each number if you would like to contact him - [VPIZZO@metlife.com](mailto:VPIZZO@metlife.com)

The release should be released within the next few weeks – refer to the Metlife build if needed.

Vic recommends waiting on going to DM7 only once this new release is available.

PNC issue 1 – Inventory in v7x is not always listing the services on the machines, services are coming up blank rather than with the correct name

PNC issue 2 - M6 / M7: changed the view for subscription target. Example:  
Inventory – 80 subscription targets, but in report center only 25 or so show up.

Metlife issue 2 – still working on getting compliance to work correctly

Metlife issue 3 – console seems to stop sending emails, and also the console is locking up.

Metlife issue 4 – intermittent fail over for repeaters, SBRP users are using Master/Mirrors rather than the local repeater, not sure why. Tuners appears to not even be checking for repeater list.

DTE – similar issue / possible fix:

When tuner starts up without a real Ip (example 127.0.0.1) rather than the actual IP it should be using.

7.2.02 – may include a fix that determines what the active link is.

## **Product Reviews:**

### **BMC Report card - ?**

<http://www.cm-ug.com/survey/survey.php?sid=28>

## **BugFix / RFE list:**

August 08 - will have an extended call to cover the list.

**BCA Server / Marimba Blade Logic transition:**

- Will be on the next call.

**New Marimba Product Manager:**

David Johnson – Sr. Product Manager

David will be taking over the entire marimba product line.

Joe – Requested a org view of BMC structure

**Acresso Demo:**
