

# Modern, scalable, and secured endpoint management

Marimba Cloud by HARMAN

Marimba User Group – May 2016

May 2016

[www.marimbacloud.net](http://www.marimbacloud.net)

## Key changes in 9.x

### Java Separation

- Marimba 9.x runs on Java 1.8
- Java Separation allow using installed java against the one that is pre bundled with tuner

### SSL

- Marimba now uses java SSL that gives better security, control (TLS 1.2, removal of insecure ciphers)

### Endpoint Manager

### ServiceNow Integration

### Analytics
